Types of Smart Devices:

- Alexa, Siri Etc. (Digital assistants with voice control)
- Smart Plugs (Turn on lamps etc. with timers or cell phone)
- Security Cameras and alarms (Ring etc.)
- Smart Lights (Bulbs, Ring, etc.)
- Thermostats
- Pool Controls
- Garage Doors
- Home Doors
- Other appliances (Ceiling fans etc.)

Hey Siri!

- Siri and Alexa can control many smart devices
- Turn on lamps, open doors etc.

Smart Plugs

Little devices that you plug in the wall and plug in a light or appliance to turn on and off, either by timer, Siri/Alexa or manually with smartphone

Smart Switches

Replace your light switch with a Smart Switch for dimming, timer control etc.

Hub control

Smart Bulbs

The bulb itself has WiFi and can be controlled with Siri/Alexa or your phone.

Some bulbs also allow color choices (Hue etc.)

Bluetooth

Dream color

Brightness

IP65 waterproof

Light Strips

Stick-on strips of LED's with color controls.

Great for mood lighting or behind TV's.

Security Systems

- Ring Doorbell, cameras and security lights
- Home security cameras
- Alarm systems (Police, Fire, Medical)
- Tracking Tabs

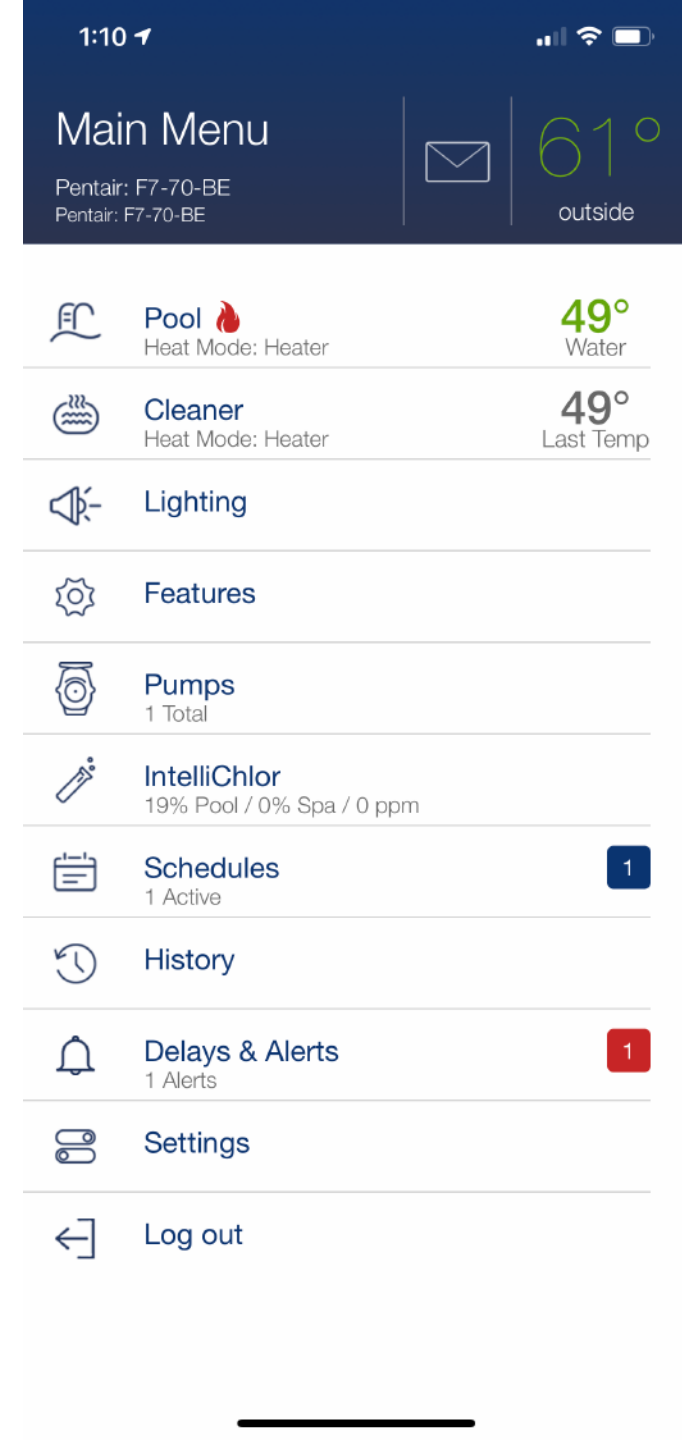

Thermostats

- Allow one to set timers
- Turn on the AC before your flight home so the house is cool when you arrive
- APS Discounts in some instances

Pool/Spa Control

- Often manual controls are hard to reach
- Set it remotely so it is ready to go when you get home
- Lighting controls often have selectable settings for color etc.

Garage and Entry Doors

- Open door for friends or relatives when you aren't home
- Amazon deliveries (Creepy?)
- Alerts when door left open

Entry Doors

- Open door with smartphone by tapping or proximity
- Allow friends or relatives in
- Amazon deliveries

Other Appliances

- Ceiling Fans
- Weather stations
- Vacuum (Roomba etc.)_
- Smart Fridges
 - Inside cameras to see how much milk you have...
